

MY STALL BUTLER

MY STALL BUTLER PERSONAL

Invented By
RICHARD NAVIN

My Stall Butler Personal is a manual push pump liquid foam soap and water spray mist dispenser. Personal Hygiene System, for use in the "home". The user of My Stall Butler Home unit simply has a bowel movement and wipes as normal. Then, they dispense 1 pump of liquid foam soap onto 4-5 squares of folded 2-ply toilet paper, wipe, and dispose into the toilet. Then repeat the process with the water spray mist to rinse. This gives the user a "Fresh, Clean, Confident" feeling, ready to face the rest of their day!
